EDUCATION

B.Tech — Computer Science

Parul Institute of Engg. & Tech.
Parul University, Vadodara
2024 – 2028 (Batch 2028)

TECHNICAL SKILLS

Languages :

Java | Python | C | JavaScript

Web Dev :

HTML5 | CSS3 | React | Node.js

AI / CV :

YOLOv8 | OpenCV | MediaPipe

Tools :

Git | GitHub | VS Code

CS Core :

DSA | OOP | Problem Solving

Cloud :

Google Cloud Platform

LANGUAGES

Hindi Native

Gujarati Native

English Professional B1+

ANANT KUMAR AGNIHOTRI

B.Tech CSE • Batch 2028 • Aspiring AI / SDE Engineer

Open to Internships • Collaborations • Projects

PROFESSIONAL SUMMARY

Aspiring **AI Engineer & Software Developer** (B.Tech CSE, Batch 2028) with hands-on experience in Computer Vision, AI/ML, and Java + DSA. Passionate about building intelligent systems with Python, YOLOv8, OpenCV, and MediaPipe. Active contributor at CodexFusion DSA sessions and SmartED campus outreach. Seeking **AI Engineer / SDE internships** to deliver real-world impact.

EXPERIENCE

Campus Ambassador

SmartED Innovations | Vadodara, Gujarat

Feb 2026 – Present

- Selected as Campus Ambassador out of competitive applicants; spearheaded promotion of technical programs, workshops, and internship opportunities to **100+ students** across campus.
- Acted as the primary communication bridge between students and the organisation — improved onboarding experience, query resolution time, and overall student participation rates.
- Coordinated outreach campaigns for technology-focused initiatives, driving awareness and sign-ups for coding bootcamps and skill-development programs.

Core Member — DSA Sessions Contributor

CodexFusion Technical Community | Vadodara, Gujarat

Jan 2026 – Present

- Actively participate in structured **DSA-focused coding sessions** following Striver's SDE Sheet and Shradha Ma'am's curriculum — consistently solving 5+ problems per session.
- Contribute to peer learning by explaining DSA concepts (arrays, linked lists, trees, graphs) to junior members and assisting them in debugging and optimising solutions.
- Engage in weekly coding challenges that reinforce algorithmic thinking, time-complexity analysis, and collaborative technical problem-solving.

PROJECTS

Real-Time Mobile Phone Detection System

Python YOLOv8 OpenCV ONNX

Engineered a real-time object detection pipeline using **YOLOv8** and **OpenCV** to detect mobile phone usage in live video. Optimised with **ONNX runtime** for sub-50ms latency — deployable in exam halls and surveillance systems.

Hand Gesture Recognition Application

Python OpenCV MediaPipe

Built a touchless gesture-controlled interface using **MediaPipe Hands** tracking **21 hand landmarks** at 30+ FPS. Custom gesture-to-action mapping enables intuitive control of system functions without any hardware peripherals.

Personal Developer Portfolio Website

HTML5 CSS3 JavaScript Netlify

Designed and deployed a fully responsive, mobile-first portfolio at **anant-agnihotri-dev.netlify.app** with custom CSS animations, smooth scroll, and an interactive project showcase — optimised for performance and SEO.

CERTIFICATIONS

- Mission Upskill India: AI Impact Summit 2026**
Pre-Summit Event — Jan 2026
- Artificial Intelligence Workshop**
IIT Bombay
- Foundational AI Skills**
Industry Certification

GOALS & ASPIRATIONS

- Build a strong **AI/ML and software engineering portfolio** with production-ready applications.
- Secure **AI Engineer / SDE internship** roles at top tech firms (Google, Amazon, IBM) by 3rd year.
- Contribute to open-source AI projects and grow as an impactful, problem-solving engineer.
